JETMIR GRUBI

SENIOR SOFTWARE ENGINEER | .NET FULL STACK

430 52nd St, Apt 207, West New York, NJ 07093
mirigrubi8@gmail.com | +1 516 727 1440 | linkedin.com/in/jetmir-grubi-741316447

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years building production software for payments, healthcare, and enterprise operations. The work is .NET full stack: C#, ASP.NET Core, React, TypeScript, JavaScript, and SQL Server, delivered on Azure and AWS.

Recent work is an enterprise payment management system covering transaction initiation, status tracking, approval, reconciliation, and integrations with payment gateways and banking APIs. Earlier work includes healthcare applications for patient management, appointment scheduling, and clinical workflows.

Builds services with clean architecture and SOLID, readable React interfaces, and repeatable CI/CD releases. Works with analysts and stakeholders in Agile delivery, from design through deployment.

TECHNICAL EXPERTISE

Backend: C#, .NET 6, .NET 8, ASP.NET Core, Entity Framework Core, REST APIs, Node.js, Express.js, clean architecture, SOLID

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, ES6+, state management, responsive UI, cross-browser compatibility

Data & Security: SQL Server, stored procedures, transactions, OAuth 2.0, JWT, role-based access control

Cloud & Delivery: Azure, AWS, Docker, Azure DevOps, Git, CI/CD, Agile, Scrum, unit testing

PROFESSIONAL EXPERIENCE

CTG | Senior Software Engineer

Oct 2022 to Present
Amherst, New York

- Designed and developed an enterprise payment management system for processing, transaction tracking, reconciliation, and financial operations.
- Built scalable backend services and REST APIs with C#, ASP.NET Core, .NET 6/8, and Entity Framework Core, following clean architecture and SOLID.
- Developed responsive React, TypeScript, and JavaScript interfaces for payment workflows.
- Implemented initiation, status tracking, approval, and automated reconciliation, including payment gateways and banking APIs.
- Designed SQL Server databases, complex queries, stored procedures, and transaction management.
- Added OAuth 2.0, JWT, and role-based access, plus background services for processing reliability.
- Used Azure DevOps, Git, Docker, and CI/CD, and worked with analysts and stakeholders in Agile delivery.

SoluLab | Senior Software Engineer

Oct 2020 to Sep 2022
New York, New York

- Developed and maintained healthcare web applications with C#, ASP.NET Core, .NET Core, and SQL Server.
- Built responsive interfaces with React, TypeScript, JavaScript, HTML, and CSS.
- Designed REST APIs for healthcare data management and system integration.
- Developed backend services for patient management, appointment scheduling, and clinical workflows.
- Used AWS for hosting, deployment, and infrastructure, and improved SQL Server query performance.
- Implemented authentication, authorization, and role-based access with the delivery team.
- Worked in Agile delivery with code reviews, debugging, unit testing, and performance and security improvements.

ELEKS | Software Engineer

Oct 2017 to Sep 2020
Jersey City, New Jersey

- Developed and maintained web applications with JavaScript, HTML5, and CSS3.
- Built responsive interfaces and reusable React components, including state and dynamic UI behavior.
- Integrated REST APIs and developed server-side functionality with Node.js and Express.
- Used asynchronous JavaScript, Promises, and async/await for data handling.
- Improved page load, frontend performance, and cross-browser compatibility.
- Used Git and code reviews with the engineering team.

SELECTED ENGINEERING WORK

Payment management system. An enterprise platform for payment initiation, status, approval, and reconciliation. ASP.NET Core services and React workflows sit on SQL Server, with gateway and banking integrations, role-based access, and background processing.

Clinical workflow platform. Healthcare applications for patient management, appointment scheduling, and clinical workflows. ASP.NET Core services and React interfaces, hosted on AWS, with SQL Server, authentication, and role-based access.

EDUCATION

South East European University

May 2013 to Aug 2017

Bachelor's Degree, Computer Science

- Finished a Bachelor's Degree in Computer Science, the academic base for the engineering work that followed.
- Built the grounding in software used later for full-stack products in payments, healthcare, and enterprise systems.
- Moved into professional engineering at ELEKS in October 2017, after graduating that August.
